

FIRST NATION HEALTH CENTRE SUPPORTING SCHEDULING

Health Centres have various approaches and needs with regards to scheduling services, clinics and appointments with their clients. This bulletin provides a brief summary of the scheduling components available in Mustimuhw software tools. We continue to evolve this functionality to meet the needs of our customers.

Mustimuhw-WeTel Client Scheduling

The Mustimuhw WeTel virtual care tool is a secure clinical SMS-Texting based alternative to social media tools for health organizations that integrates scheduling with client communications.

- Clinic based Client appointment booking
- SMS-Text Reminders sent to client
- SMS-Text Alerts sent to Clinicians
- Used by BC Children's Cardiology Unit to schedule thousands of virtual visits during the pandemic

Schedule and Manage:

Virtual Visits (phone, text, video)	Medical Transportation
Clinic Visits	Client Reminders
Home Visits	Follow-up Visits

Mustimuhw-COHI Dental Scheduler

The Mustimuhw Children's Oral Health Initiative (COHI) screening calendar allows providers to book client appointments based on the available dental chairs.

Mustimuhw- Home & Community Care Resource Scheduler

The Mustimuhw Home & Community Care resource scheduler coordinates the booking of Personal Care Aides / Personal Support Workers with their assigned clients.

Mustimuhw- Integrations to 3rd Party Schedulers

Mustimuhw has the capacity to integrate with 3rd-party scheduling systems, such as, the WellSky client scheduler.

Mustimuhw- Medical Transportation Scheduler

The Mustimuhw Medical Transportation van scheduling features allows clerks to schedule van drivers for picking up clients for medical appointments.

*SMS stands for "Short Message Service". An SMS-Text is a type of messaging that uses standardized communications protocols allowing fixed line or mobile phone devices to exchange short text messages. All mobile phones have SMS-Text. A data plan or internet connection is not required for SMS-Text messaging.
