

FIRST NATION HEALTH CENTRE SUPPORTING VIRTUAL CARE

Mustimuhw Information Solutions has partnered with one of the leading Canadian experts in Virtual Care - Novari Health. This partnership positions us for the release of an integrated Mustimuhw cEMR extension for virtual care, powered by Novari Health's eVisit solution.

KEY BENEFITS

Safe remote care during COVID-19

Increased clinical encounters and communications with clients

Virtual care visits, as a supplemental level of service, improves quality of care

Improved client access to care. Lower social cost for client visits

Improved health information security (Digital health tools more secure than social media tools)

Community access to more external care providers when required

Integration coming for cEMR clinical encounter documentation & reporting

With the current COVID-19 pandemic, communities have increasingly recognized the potential value for virtual care and the role a solution like **eVisit** can play in their organization. The Mustimuhw **eVisit** solution can strengthen a number of key workflows in the Health Centre, from Home Care Nursing and monitoring, to Mental Health, community health nursing, and even Medical Transportation management. Many organizations are currently having some staff attempt to work less from the central office and more remotely when possible. The Mustimuhw **eVisit** solution can effectively enable continued client care and service delivery even under the current pandemic circumstances.

The Mustimuhw eVisit solution manages a virtual care encounter in the context of a clinical visit, allowing providers to align to their clinical documentation and reporting frameworks. Visits can be synchronous with video and audio, or asynchronous with secure text messaging.
